Project Title: The Emu War

I would like to build a website that breaks down The Emu War, with multiple pages, and a navigation bar at the top. It can be broken down into:

- **Background information about emus**
  - What the species is, where it originates, emu's relationship to crop destruction
- **Background information about the war**
  - Here, we can define a nuisance wildlife management operation, and the goal of the emu war
- **The first attempt of the war**
  - Outline deaths, what was gained, what was lost
- **The second attempt of the war**
  - Same idea as first attempt
- **The aftermath**
  - Was the problem solved, environmental impacts
